Sun Glare While Driving

Tips to Stay Safe When Driving Toward the Sun

- Invest in POLARIZED sunglasses. Polarized sunglasses block out horizontal waves that come from reflected light.
- Be sure to leave plenty of distance between your bus and the vehicle in front of you so you have room to come to a stop without danger.
- Keep your windshield clean and free of cracks that can cause the light to spread and intensify glare.
- Keep your dashboard free of items such as electronics or glossy items that can reflect light.
- Avoid Distractions. Things such as cell phones and music players can take away your attention when driving in general (not just in harsh sun conditions). Driving requires your full attention.
