Changing Lanes

Increasing Your Chance of Having a Collision

If you must change lanes use the following procedures:

- Activate your turn signals;
- Check traffic in the next lane, behind and in front of the bus;
- Move smoothly into the next lane;
- Cancel your turn signals;
- Maintain a proper following distance.

The turn angle should be smooth enough that passengers do not sense the bus path has changed. Smooth gradual lane changes will allow you to abort the lane change if necessary.
